

# CSE 534: Multimedia Systems

## Guide to Project Final Report

1. Cover Page:
  - a. Your cover page should include: (1) the project title, (2) your name, (3) your student number, and (4) date of submission.
2. Literature Review:
  - a. Your final report should include the review of relevant research. You may re-use some contents in your midterm report.
  - b. The literature review should clearly lead to the answer why you selected this particular project
3. Project Proposal Report Format:
  - a. Introduction:
    - i. Advances in general multimedia communication research
    - ii. Literature reviews (comparison of several (>3) papers)
    - iii. Why you select this particular project
    - iv. Overview of the project
  - b. Your Proposed Approach:
    - i. The overall system and how the proposed component fits
    - ii. The hardware/software implementation plan
    - iii. Resource used for implementation
  - c. Outcome and Deviations
    - i. Presentation of the project outcome (experimental results)
    - ii. Discussion of the outcome (any deviation? Why?)
    - iii. Lessons learned from the experiments
  - d. Summary and Discussion
    - i. Summary of the project
    - ii. Lessons learned in this course (both classroom teaching, quizzes, homework sets and the project)
  - e. Acknowledgement (optional)
  - f. Reference List (Bibliography – papers cited in this report, especially the papers for literature review)
4. This final project report should be between 6-10 pages and is due by **11:59pm on Tuesday, May 16, 2017**. Please submit via UBlerns links. Please include your name in your file name.
5. Demo of several projects may be requested randomly from selected students. You should be available for such request on May 17 and 18.
